

To Whom It May Concern,

It is my understanding that MD Helicopters has done business with Alziebler since 1969. I have worked for MD Helicopters for 2-1/2 years as the warranty/Repairs Buyer. A year and half ago, I took on a number of machined parts supplied to MD Helicopters from various suppliers.

Since my earliest involvement with Stephanie and Robert Allen from Alziebler, I have found their company to be world class in a number of ways. Their representation of MD Helicopters products to our customer base has always been fair, courteous and above all, professional in every respect. They have always taken pride in their on-time delivery, quality of parts, competitive pricing and error free paperwork. As a manufacturer of helicopters, the attention to details is greatly appreciated.

Alziebler has consistently achieved positive results in the manufacturing of parts for MD Helicopters. Our customer's recognize the high level of value they are getting from their products.

Alziebler can be relied upon in AOG situation. When parts are needed for customers with grounded helicopter parts, they go out of their way to get the parts as soon as possible. Their main objective is to help MD Helicopters get the customer's helicopter back in the air.

It is my pleasure to recommend Alziebler as a supplier of machined parts. I look forward to working with them now and in the future.

Sincerely,
Karen Cash-Weakly
Buyer
