TO WHOM IT MAY CONCERN:

I have been affiliated with Alziebler Company for some 30 years, starting with the previous owners. Senior Aerospace Ketema, a multi-global aerospace division of Senior PLC, manufactures complex engine component parts of various sizes and complexity. Our customer base includes most of the major airframe manufactures, such as Beechcraft, Sikorsky Aircraft and Learjet.

I highly recommend Alziebler Company as an excellent machine shop in the machining of the various parts that they currently build and have built for us in the past. Their quality is excellent and the accompanying paperwork, certifications, etc. is always perfect.

They are always available if questions arise, excellent packing of parts to avoid damage, and equitable pricing.

Regards, 
Dick Hoolihan
